(54) Title: DUMMY

FIG. 2

(57) Abstract: A dummy (1) having an upper part (2) and a lower (3) part and is formed in a lightweight material, where the lower part is formed with a ballast (5,7) having a weight that is sufficient to let the dummy stand alone. In embodiments, the ballast is formed as feet (5) or as a hemisphere (7).

**Dummy.**

The invention relates to a dummy having an upper and a lower part, the lower part having feet and legs, said dummy is formed in a lightweight material.

DK 2012 00141 discloses a dummy that is formed in a lightweight material, said dummy can be consist of several parts such as arms, legs body and so forth.

10 This lightweight dummy is formed in a magnetic influentially material that makes it suitable for placing the dummy on a wall having magnetic properties.

I case that the dummy should be used at an exhibition where a wall not having magnetic properties or in case the dummy should be placed freely it is a problem that the dummy cannot standalone.

It is therefore an object with the invention to solve this problem maintaining the advantages the lightweight dummy has.

The object is fulfilled according to the invention with a dummy of the kind defined in the introductory part of claim 1, that is characterised in, that the lower part of the dummy is formed with a ballast having a weight that is sufficient to let the dummy standalone.

It is expedient, as stated in claim 2, that that the ballast constitutes of the feet, and as stated in claim 3, that the ballast constitutes of the feet and part of the legs.

If the whole dummy is formed in a lightweight material and the dummy should be used as a standalone dummy, then is advantageous if, as stated

in claim 4, that the feet is fixed to the ballast, or, as stated in claim 5, that the ballast is a hemisphere that being, as stated in claim 6, filled with water or sand or is formed in a solid material.

5 The invention will now be more fully explained in connection with the drawing in which

Fig. 1 shows a dummy according to the invention in a first embodiment, whereas

10

Fig. 2 shows the dummy according to the invention in a second embodiment.

On the figures 1 denotes in its entity a dummy (sometimes called a dress form), according to the invention.

15 As it can be seen, the dummy 1 consists of an upper part 2 and a lower part 3, where the lower part 3 comprises legs 4 and feet 5,6 and eventually a ballast (7), (fig. 2).

The feet 5 is formed as a ballast in a material having a weight that is sufficient so the dummy can stand can be placed upright without needing  
20 further support.

In the fig 2 embodiment the feet is formed in the same lightweight material as the other parts of the dummy, but the feet is fixed to a hemisphere 7, eventually having an hole with a filler closure 8 used in connection with supplying water sand or the like to the hemisphere.

25 The hemisphere can also be formed as a parachute foot.

## Claims

1. Dummy having an upper (7) and a lower (3) part, the lower part having feet (5) and legs (4), said dummy is formed in a lightweight material, **characterized in**, that the lower part (3) of the dummy is formed with a ballast (5,7) having a weight that is sufficient to let the dummy stand alone.
2. Dummy according to claim 1, **characterized in**, that the ballast constitutes of the feet (6).
3. Dummy according to claim 1 - 2, **characterized in**, that the ballast constitutes of the feet (6) and part of the legs (4).
4. Dummy according to claim 1, **characterized in**, that the feet (6) is fixed to the ballast (7).
5. Dummy according to claim 1 - 4, **characterized in**, that the ballast (7) is a hemisphere.
6. Dummy according to claim 5, **characterized in**, that the hemisphere (7) is filled with water or sand or is formed in a solid material.

## INTERNATIONAL SEARCH REPORT

International application No

PCT/DK2014/000036

## A. CLASSIFICATION OF SUBJECT MATTER

INV. A47F8/00

ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

A47F A41H

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPO-Internal, WPI Data

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	FR 632 697 A (SOCIÉTÉ DES ANCIENS ÉTABLISSEMENTS SIEGEL ET STOCKMAN RÉUNIS) 13 January 1928 (1928-01-13)	1-3
A	page 1, line 47 - line 53 page 2, line 17 - line 22 figures	4-6

	sentence 10, paragraph 2 - sentence 19; figures	

 Further documents are listed in the continuation of Box C. See patent family annex.

\* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;" document member of the same patent family
